Dataset

Email body	Email subject	output
you won 1000000	Notice	Spam
How are you	conversations	Not spam
credit - cards	Bank	output

→ Tokenization

→ stop word removing

→ stemming

→ Lemmatization

1. NLP ?

2. Application of NLP

3. Token-?, s.w.r?, will we use stopword all time, stem stemming, lema-?

4. Difference between stem- and Lema

5. Adv, disadvantage of stem and Lema

- Corpus

- Vocabulary

- Document

- Word

Movie Review

comments

This is _____

The movie _____ I don't

like _____

output

positive

negative

One Hot Encoding

D1	student read DL
D2	DL read DL
D3	student write comment
D4	DL write comment

convert in corpus

~~All dataset's feature and~~

student read DL DL read DL

student write comment, DL write comment

vocabulary

student, read DL write command

dimension - 5

$D_1 [1, 0, 0, 0, 0]$, $[0, 1, 0, 0, 0]$, $[0, 0, 1, 0, 0]$
student read DL

Dimension of D_1 - 3,5

Advantage

1. Easy to compute

Disadvantage

1. no fixed sized
2. sparse dataset

Bag of Word

D1	student read D2 read	1
D2		1
D3		0
D4		0

Vocabulary

D1	student	read	DL	write	comment	But
	1	1	1	0	0	0

ad and disad
